

# VIGNESHWARAN SIVASUBRAMANIYAN

## SENIOR CLOUD & DEVOPS ENGINEER

vigneshsivasubramaniyan@gmail.com | +91-8122227828 | Chennai, India | [linkedin.com/in/vigneshwaran-sivasubramaniyan](https://www.linkedin.com/in/vigneshwaran-sivasubramaniyan)  
| [github.com/vigneshsivasubramaniyan](https://github.com/vigneshsivasubramaniyan) | [vignesh.madrasmic.in](mailto:vignesh.madrasmic.in)

## PROFESSIONAL SUMMARY

Results-driven Senior Cloud & DevOps Engineer with 8+ years of experience designing and operating enterprise-grade Kubernetes, OpenShift, and cloud-native platforms on AWS. Proven track record in building zero-downtime CI/CD pipelines (GitHub Actions, Jenkins), infrastructure-as-code (Terraform, Helm), GitOps workflows, and full-stack observability (Prometheus, Grafana, Loki). Deep hands-on expertise across the VMware stack (vSphere, ESXi, vROPS) and hybrid cloud environments. Passionate about platform reliability, security automation, and driving DevOps culture across cross-functional teams.

## CORE TECHNICAL SKILLS

|                           |                                                                                            |
|---------------------------|--------------------------------------------------------------------------------------------|
| Container & Orchestration | Kubernetes, Docker, Helm, OpenShift, Portainer, Container Registry Management              |
| CI/CD & GitOps            | GitHub Actions, Jenkins, GitOps (ArgoCD), Pipeline Automation, Build/Test/Deploy Workflows |
| Cloud Platforms           | AWS (EC2, S3, IAM, VPC, EKS), Cloudflare Tunnel, Cloudflare Zero Trust, Hybrid Cloud       |
| IaC & Automation          | Terraform, Ansible, Helm Charts, PowerCLI, YAML, Shell/Bash Scripting, Python              |
| Observability & SRE       | Prometheus, Grafana, Loki, Alertmanager, Incident Response, SLA/SLO Management             |
| Virtualization            | VMware vSphere 6.x/7.x, ESXi, vCenter, vROPS, vMotion, Distributed Switches                |
| Networking & Security     | L2/L3 Networking, Zero Trust Security, Port Groups, Firewall, DNS, Load Balancing          |
| Other                     | Git/GitHub, Linux (Ubuntu/RHEL), n8n, ML/LLM Tooling, vLLM, LiteLLM                        |

## WORK EXPERIENCE

### Senior Cloud Engineer

Oct 2024 – Present

#### Tata Consultancy Services (TCS)

Chennai, India

- Architected and maintained end-to-end CI/CD pipelines using GitHub Actions and Jenkins, reducing deployment cycle time and enabling automated build, test, image push, and Kubernetes rollout workflows for 10+ microservices.
- Led Kubernetes cluster management and container orchestration initiatives, ensuring 99.9% uptime for high-availability microservice deployments across dev, staging, and production environments.
- Drove cloud-native migrations and infrastructure automation using Terraform, Helm, and GitOps-based workflows, reducing manual provisioning effort by standardizing repeatable infrastructure patterns.
- Managed the full container image lifecycle including registry optimization, vulnerability scanning, and secure multi-environment deployment strategies.
- Resolved complex L2/L3 CI/CD, Kubernetes networking, and infrastructure incidents through structured root-cause analysis in collaboration with development, cloud, and SRE teams.
- Integrated Cloudflare Tunnel and Cloudflare Zero Trust into hybrid cloud architecture, improving network security posture and eliminating public-facing exposure for internal services.
- Built and maintained full-stack observability platform (Prometheus, Grafana, Loki, Alertmanager), implementing automated alerting and dashboards that improved incident response time by 40%.
- Leveraged AWS services (EKS, EC2, S3, IAM, VPC) for workload migration and hybrid cloud integration projects.

## DevOps Engineer

Accenture Pvt Ltd

Oct 2021 – Oct 2024

Coimbatore, India

- Designed and maintained CI/CD pipelines using Jenkins and GitHub Actions, automating build, test, and deployment workflows for multiple application teams and significantly reducing release cycle time.
- Managed containerized workloads using Docker and Kubernetes, handling deployment configuration, horizontal scaling, and troubleshooting across development, staging, and production environments.
- Automated infrastructure provisioning and configuration management using Ansible and Shell scripting, standardizing environment setups and reducing manual provisioning effort by 60%.
- Implemented monitoring and alerting solutions with Prometheus and Grafana, building dashboards that enabled proactive detection of performance issues and infrastructure incidents.
- Collaborated with development and SRE teams on root-cause analysis for CI/CD pipeline failures and infrastructure incidents (L2/L3), driving permanent fixes and improving system reliability.
- Managed cloud infrastructure on AWS (EC2, S3, IAM, VPC), supporting application deployments and ensuring secure, cost-optimized resource utilization across environments.
- Contributed to infrastructure-as-code (IaC) practices using Terraform and Helm, enabling version-controlled and repeatable environment provisioning across the delivery pipeline.
- Participated in Agile/Scrum ceremonies, planning and delivering DevOps infrastructure improvements aligned with development sprint roadmaps.

## Infrastructure Specialist Engineer

Mphasis Pvt Ltd

Aug 2017 – Oct 2021

Chennai, India

- Administered VMware vSphere 6.x environments, managing ESXi hosts, VM lifecycle (provisioning, snapshots, cloning, templates), and hardware version upgrades for a 300+ VM estate.
- Maintained ESXi patch compliance using VMware Update Manager, proactively applying patches to maximize performance, stability, and security across the virtual infrastructure.
- Coordinated with hardware vendors for server-level issue resolution, reducing infrastructure downtime through rapid escalation and structured problem management.
- Streamlined VM deployment by creating and maintaining standardized templates, cutting provisioning time from hours to minutes.

## Infrastructure Specialist Engineer

Sharp Gaze Pvt Ltd

May 2016 – Aug 2017

Chennai, India

- Managed Windows and Linux server installation, configuration, and administration to support enterprise application operations.
- Administered ESXi hosts and vCenter Server, performing daily VMware operations including VM provisioning, vMotion migrations, and decommissioning/reconfiguration tasks.
- Contributed to data centre operations including hardware racking, cabling, and routine infrastructure maintenance.

## KEY PROJECTS

---

### Two-Tier Web Application CI/CD Pipeline

Tools: GitHub Actions, Jenkins, Docker, Kubernetes — Designed and implemented end-to-end CI/CD pipelines for containerized microservices covering automated build, unit testing, container image push to registry, and rolling Kubernetes deployments. Demonstrates full GitOps lifecycle from commit to production.

### Self-Hosted DevOps Home-Lab

Tools: Docker, Kubernetes, Portainer, Ubuntu, Prometheus, Grafana — Built a full-stack DevOps sandbox environment for hands-on experimentation with container orchestration, CI/CD workflows, observability, and GitOps — reflecting commitment to continuous learning and practical skill development.

## EDUCATION

---

### Bachelor of Engineering (B.E.)

2014

Rukmani Varadarajan Engineering College, Vedaranyam

## LANGUAGES

---

English (Native / Bilingual) | Tamil (Native)
